NOTICE OF PROPOSED AMENDMENTS

NOTICE OF PROPOSED AMENDMENTS

- 2) Code Citation: 89 Ill. Adm. Code 240
- 3) Section Numbers: Proposed Action:
240.729 New Section
- 4) Statutory Authority: Ill. Rev. Stat. 1991, ch. 23

Pursuant to the budgetary crisis of FY92, the Department on Aging implemented rulemaking under the Emergency Budget Act of FY1992 which reduced services to all Community Care Program clients (inclusive of in-home services (chore- housekeeping and homemaker) and adult day care service).
As a result of restored appropriations to adult day care service for FY93, and the severe impact of service reductions on elderly adult day care clients, it has become necessary to propose a new rule which delineates increases to adult day care service maximum levels.
Effective July 23, 1992, those agencies which provide adult day care service under the Community Care Program will begin to increase service maximum levels. Those agencies which provide adult day care service under the Community Care Program are affected by this rulemaking.
The purpose of this rulemaking is to allow the Department to increase adult day care service maximum levels, thereby ensuring that adult day care service is being delivered in the manner prescribed by law and in a manner to protect the safety and welfare of adult day care clients.

- 7) Does this rulemaking contain an automatic repeal date?

5) A Complete Description of the Subjects and Issues Involved:

Public Act 87-741, which was signed into law in September 1991, makes it possible for community college boards of trustees to access the services of the State Comptroller's offset collection system to collect debts which board of trustees have been unable to recover through standard collection processes. These collection provisions have been available to public universities, and this law now provides the same benefits for community colleges.

The law also states that the Illinois Community College Board shall act as the "notifying agency" and shall account to the relevant community college board of trustees for payments received as a result of collection efforts conducted by the State Comptroller. The proposed administrative rules specify the process that boards of trustees must follow to certify uncollectible debts to the Illinois Community College Board.

Safety Guidelines for Workers Removing or Covering Leaded Soil

- a) Workers shall be provided with a pre-employment physical to determine blood lead level and ability to wear appropriate respiratory protection. Workers shall not be permitted to perform lead removal work if they have blood lead levels greater than the permissible limits set forth in Section 845.10.
- b) All workers removing or covering leaded soil should receive appropriate safety training designed to reduce their exposure to lead, and the risk of job-related injuries.

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

- c) Workers shall be provided with a changing area equipped with a facility for showering. Workers shall be required to change into personal protective clothing before entering the job site, and to remove personal protective clothing and shower after leaving the work site, as provided in Section 845.30(c)(2) and (d).
- d) Personal and equipment decontamination procedures shall be employed to prevent the spread of lead contamination. Disposable items are not to be reused and shall be discarded as provided in Section 845.30(O)(2)(c).
- e) Protection for workers removing or covering leaded soil shall meet the requirements of Section 845.30(c) and (d). Personal air monitoring for lead and/or respirable dust exposure shall be done at appropriate intervals.
- f) Safety Guidelines During Soil Remediation or Removal

- 1) If the soil is suspected as a source of lead involved in a child lead poisoning, samples shall be submitted to a certified testing laboratory for analysis for lead or be tested with a spectrum analyzer to determine the lead content. Soil which is to be removed shall be submitted to a certified testing laboratory for Toxic Characteristic Leaching Procedure (TCLP) analysis. Following the TCLP analysis, appropriate permits shall be secured from the Illinois Environmental Protection Agency (IEPA). The owner or its agent shall be responsible for determining waste generator status by contacting the IEPA.
- 2) Prior to beginning soil remediation or removal, the source of the lead contamination shall be identified and eliminated to prevent re-contamination of the remediated soil.
- 3) Initial sampling shall consist of a single soil core approximately one inch in diameter and not to exceed one inch in depth. One sample is to be taken for every 10 lineal feet of the dwelling unit, evenly spaced around the dwelling unit, approximately 2 feet away from the dwelling. Samples shall also be taken in areas around the dwelling unit where children play if those areas were not included in the initial sampling. (See Appendix E). Analytical results of these samples will be used to establish the bounds of the clean-up area relative to background lead levels. (Background is defined as the lead level occurring in the top one inch of an area of soil which has not been affected by human activity.) Removal should occur to the area and depth necessary to reach background lead levels.
- 4) Removal or remediation of the soil shall be accompanied by dust suppression methods, and the generation of dust shall be held to a minimum. Monitoring of airborne dust shall be performed and, if acceptable levels are exceeded,

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

additional dust suppression steps shall be taken or work halted until dust is controlled. Airborne lead analysis may be performed in conjunction with dust measurements.

- 5) Soil which is stockpiled prior to disposal shall be:
- A) placed on a layer of impermeable plastic;
 - B) kept moist to avoid dust generation; and
 - C) covered with impermeable plastic which is secured to the ground.
- 6) Contaminated soil shall be transported to disposal areas in sealed containers or in a covered vehicle. Off-site vehicular or foot tracking of contaminated soil shall be avoided.
- 7) Clean topsoil, having a lead level at or below background soil lead levels, shall be used as a fill material and the soil reseeded or resodded. Ground cover shall be used until the new grass is established.
- g) Alternate or temporary remedial actions include the following:
- 1) Small areas may be covered with plastic or decorative rock, gravel, wood chips or similar landscaping material to a depth of three inches. Bare soil should be revegetated if possible.
 - 2) Soil may be tilled under or mixed to a depth of six inches, followed by placement of three inches of clean topsoil, and reseeded or resodding. Soil additives (i.e., lime) should be considered to reduce lead bioavailability. The tilling process shall not cause excessive dust.
 - 3) Large areas of bare soil (i.e., driveways, parking lots, etc.) may be covered in concrete or asphalt to an appropriate depth to accomplish the intended use.

to children under age 16, is found in or upon a dwelling or residential building upon inspection, the owner may be advised in writing by the Department or delegate agency of the procedures to follow in removing or permanently covering the hazard. The owner shall then be ordered to remove, replace or securely and permanently cover the lead-bearing substances. The Department or recognized local health department delegate agency shall order the dwelling owner and/or occupants to take immediate temporary steps to eliminate any hazard to a child under age 16 for whom continued exposure presents a clear potential for immediate and severe physical or neurological damage in the event that appropriate permanent repairs cannot be immediately achieved. These emergency temporary measures are discussed below, followed by permanent repair or abatement procedures.

- 1) May post upon the dwelling of the individual identified as having a level of lead in his or her blood above the permissible limits or upon the residential building identified as containing lead-bearing substances, a notice of the existence of such substances, in a conspicuous place;
- 2) May inform the local health department of the results of the Department's or the delegate agency's determination and provide recommendations for elimination of the problem areas;
- 3) May, in the event that small children reside in or frequently inhabit the premises, notify the homeowner, the occupant, or their representatives that lead-bearing substances are present on the surfaces of the dwelling or the residential building and may constitute a hazard to the health of children; and
- 4) May notify the owner of the dwelling or the residential building in writing, or in person, advising of the existence of such substances with instructions that these substances if accessible to children shall be removed, replaced, or securely and permanently covered as required by this section.

- b) The following are considered temporary lead hazard repair measures, and are not to be considered as final actions in complying with the law or fulfilling requirements set forth by the Department or delegate agency. Temporary lead hazard repairs shall be completed within 7 days of receipt of written notification. The following methods are only a means of temporarily eliminating the lead hazard risk to the child until permanent removal of the lead-bearing substance is completed in accordance with this Part. The owner or his agent shall comply with Section 845.30 (c) and (d) of this Part when making temporary lead hazard repairs.

- 1) All loose paint shall be moistened and carefully scraped from the walls, ceiling, woodwork, and any other peeling surfaces, and These areas shall then be covered with contact paper, cloth, canvas, or other material for the purpose of preventing that will prevent the paint chips from falling on the

floor and preventing a child under age 16 from peeling the paint from the wall. All paint chips shall be collected and sealed in plastic bags for proper disposal in accordance with subsection (n) of this Section.

- 2) Areas which may be chewed upon by a the child under age 16 shall be covered with heavy paper, cardboard, cloth or canvas.
- 3) All plaster and paint chips shall be collected, and any surfaces that have collected paint dust shall be cleaned by damp mopping with a phosphate-containing detergent or trisodium phosphate (TSP). Since lead dust is hazardous if inhaled, proper precautions must be taken to avoid inhalation of the dust. This applies to everyone, regardless of age.
- 4) If the temporary repairs described in items 1 through 3 above will not result in protection of a child under age 16, or are not practical, the room in which the hazard is present shall be closed and locked so that it will not be accessible to children, under age 16, or the a child under age 16 shall be removed to a lead-safe free home during abatement renovation.
- e) The following are considered as permanent repairs and shall be completed within 90 days of receipt of written notification:
 - 1) All loose and peeling paint shall be removed from the walls, ceiling, and woodwork by scraping. In addition, all paint chips shall be swept up off the floor when scraping is completed. The wall shall be covered up to a height of four feet with wallboard, plywood, ceiling tile, synthetic or fibrous paneling, fabric-backed vinyl wall covering. All holes or cracks in the wall must be patched and the entire surface intact and smooth before being covered with vinyl or other firmly adhering fibrous material.
 - 2) Above the four foot level, the walls and the ceilings shall be scraped and then maintained in a tight condition. The areas above the four foot level may be repainted with a nonteleaded paint after the scraping is completed.
 - 3) Woodwork below the four foot level shall be stripped to the barewood and may then be repainted, varnished, or covered with a nonteleaded substance.
 - 4) Woodwork above the four foot level shall be scraped to remove all peeling and flaking paint. It shall then be maintained in a tight condition.
 - 5) Other painted surfaces required to be repainted, such as toys, furniture, radiators, cribs, and any other surfaces upon which children under age 16 may chew shall be stripped to the bare wood or metal, and then may be repainted with a nonteleaded substance.

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

- d) The dwelling shall be considered in compliance with the Act only after permanent repairs have been completed.
- e) Any method of permanent repair other than those specifically described in Section 845.30(c) above, may be submitted by the dwelling owner for the approval of the Department. No alternative method of repair will be approved which will not result in permanent and total protection of dwelling residents from exposure to lead hazards.
- f) The Department may extend the period of time originally established in writing upon written request from the owner only if the condition is not an imminent health hazard to the occupants. Such extension shall not be granted until the dwelling has been reinspected at least 30 days after the owner has been ordered to remove or permanently and securely cover the identified lead hazards. In addition to the imminence of the health hazard, the Department shall consider the following factors in determining whether to grant an extension of time: availability of alternative housing for the affected child so that the child will not be exposed to further lead hazards during removal; evidence of a reasonable effort on the part of the owner to come into compliance with the law; the owner's willingness to enter into a written agreement specifying a time table for the completion of all required repairs; financial ability of the owner; and other factors which may be relevant in a given case.

c) Personal Protection

- 1) An owner, its agent, or any person who is performing corrective action that is prescribed by the Department or a delegate agency for lead abatement in a dwelling, shall take the following precautions to protect his or her health and the health of occupants of the dwelling during any lead abatement that may produce lead dust or fumes. Monitoring of airborne dust shall be performed when work is in progress and respiratory protection shall be provided in accordance with this Section:
- A) No children, pregnant women, unprotected nonworkers, or pets shall be permitted to enter the work site.
- B) Respiratory protection shall be worn by all individuals at the work site who may be exposed to lead dust or fumes at all times during lead abatement activities. Respiratory protection shall be worn until all areas have been thoroughly cleaned as described in subsection (n) of this Section. The following are the minimum respiratory protection requirements:

- C) Only approved Mine Safety and Health Administration (MSHA) respirators shall be used. Respirators shall be properly fitted for all persons working at the site. If any worker has a medical history of respiratory problems, a physician should be contacted for testing to determine if the person may wear such respirators.
- D) The manufacturers' instructions shall be followed for maintenance, proper fit, use of appropriate cartridges, cleaning, repair, replacement of defective parts, appropriate storage, and the frequency of cartridge replacement for the specific respirator in use.
- (NOTE: Respirators are not effective if facial hair (a beard etc.) is present because a good seal cannot form between the respirator and skin.)
- E) Respirators shall not be removed while in the work site.
- F) Additional respiratory protection by supplemental filters, such as organic vapor cartridges, may be needed when handling some coating products. Consult the Material Safety Data Sheets (MSDS) and obtain the proper filters as necessary.
- 2) Individuals at the work site shall wear full body suits with hoods and shoe covers. A TYVEK or similar type of disposable suit may be worn. Disposable suits shall be used once, then properly discarded. Protective clothing, as described above, and other personal protective equipment (PPE) shall be put on prior to entering the work site. Protective clothing shall be worn in the work site until the area has been thoroughly cleaned as described in clean-up activities in subsection (n). may splash or fragment, or if protective eye wear is specified on the Material Safety Data Sheet (MSDS) for that product.

d) Personal Hygiene Practices

- 1) Eating, drinking, smoking, and applying of cosmetics are not allowed in the work site. Any person leaving the work site shall rinse his or her mouth with potable water and wash hands and face thoroughly before eating, drinking or smoking.
- 2) All individuals shall wash or shower before leaving the work site for the day.

e) Notice to Occupants. The owner shall give notice to the occupants of a dwelling to be abated for lead, at least 7 days but not more than 30 days, before a contractor or the owner may commence a lead abatement project. The owner of the building in which the lead abatement project is to take place shall notify all residents of:

- 1) the area which is to be abated;
- 2) the date on which abatement is to commence; and
- 3) the occupants' obligations under this Section to place all personal items in a box or other closed, easily handled container. NOTICE OF PROPOSED AMENDMENTS

abatement in the work areas shall be conducted between the hours of 9 a.m. to 3 p.m. only, and the work area shall be cleaned with a HEPA vacuum at the end of each working day until all surfaces are free of visible dust and debris.

g) Negative air pressure shall be maintained in work areas undergoing lead abatement in multiple dwelling units and in residential buildings having a common area, in which any unit of the building is undergoing lead abatement. Section 845, Appendix B. Testing for Lead in Paint by Portable X-Ray Fluorescence Lead in Paint Analyzer

a) Operation of the XRF and Interpretation of Measurements

This section is devoted exclusively to direct reading XRFs; the qualifier "direct reading" will generally be omitted, in this section only. There are four topics: first, tests for correct operation of the instrument; second, improving the precision of the reading by taking repeated measurements; third, improving accuracy by correcting for the reading obtained on the substrate to which the paint adheres; fourth, statistical rules for deciding whether the lead level in the paint exceeds the standard.

1) Checking the Operation of the XRF

There are two different types of checks that the operator should perform to ensure that the instrument is operating properly. The XRF should be tested hourly against the manufacturer's standards or, if the inspection time is less than one hour, at the beginning and end of unit inspection. The instrument should give a reading within the specified tolerance for each standard.

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

especially the zero standard.

The manufacturer's specifications generally require that the variability to be expected in a single measurement be no greater than 0.5 mg/cm². This can be checked quite simply by taking 3 repeated measurements at the same point. These will generally be different, not necessarily because of operator error or problems with the instrument, but because of the natural variability of XRF measurements. However, too great a variation in the 3 values can provide a reliable indication of problems. If the range (maximum-minimum) of the three measurements exceeds 1.7 mg/cm², the measurements should be discarded and the process repeated. Often, the problem will be due to a change in substrate and will correct itself. If the second set of three measurements also fails the range check, the specific XRF should not be used on that type of building component, and should be checked against the manufacturer's standards to determine whether it is operating properly.

Improving Precision by Repeated Measurements

The basic technique for reducing the variability of XRF readings is to take repeated measurements at the same point. Statistical theory shows that the variability of the average of a set of repeated measurements is less than the variability of individual measurements. For example, the average of three independent readings is 42% less variable than a single reading. The greater the number of repeated measurements, the greater the reduction in variability. For practical reasons, XRF operators are generally required to take three readings at each sampled point. An exception may be made when the first two readings are very high, e.g., over 6.0 mg/cm². Two such readings are considered reliable evidence that the lead level in the paint exceeds the standard. In the rest of this section, an XRF reading will be assumed to be the average of three repeated measurements, unless otherwise noted.

3) Improving Accuracy by Correcting for the Substrate Reading

The XRF instrument will give a zero lead reading only on certain very simple substrates for which it is set to zero by the manufacturer. In other words, the XRF will generally give a nonzero reading on a surface that is lead-free. Such readings can be positive or negative. In the NIST study, readings as high as 2.0 mg/cm² were obtained on lead-free surfaces. This means that, unless the XRF reading is very high, there is a real possibility of interference by the substrate beneath the paint.

A reading of 3.0 mg/cm² on a flat surface, or 4.0 mg/cm² on a curved surface or one whose area is less than the minimum specified by the manufacturer, is considered sufficiently high to provide assurance that the lead level in the

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

paint exceeds 1.0 mg/cm^2 . If the reading is below these levels, the PHA can choose either to obtain laboratory analysis for the component or to correct the XRF measurement for interference from the substrate. This is accomplished by removing the paint down to the bare substrate, taking three repeated measurements on the bare substrate, averaging these measurements, and subtracting this result from the reading obtained on the paint. The following terminology is often used:

Apparent Lead Concentration (ALC) = Average of 3 paint readings

Substrate Equivalent Lead (SEL) = Average of 3 bare substrate readings

Corrected Lead Concentration (CLC) = $\text{ALC} - \text{SEL}$

The NIST study showed that, for practical purposes, the substrate correction removes any bias in the lead concentration reported by the XRF. It is quite possible for the CLC to be negative, because of the variability of the instrument. However, a CLC of -0.6 mg/cm^2 or less is an indication that the specific XRF does not provide reliable readings on the component being tested. The XRF should be checked against the manufacturer's standards to ensure it is operating properly.

In inspecting the units of a typical housing project, it will generally be possible to establish substrate corrections applicable to all components of the same type in similar units. Thus, for example, all doors in a building may be of the same construction. In such cases, paint need be removed from only one or two of the components in order to determine the substrate correction. This will greatly reduce the number of samples for which paint must be scraped. However, the inspector must be careful to ensure that the substrate truly is the same as the one for which an SEL determination has been made. Thus, this approach will generally not be feasible when inspecting a project which consists of a large number of dissimilar buildings.

4) Statistical Rules for Deciding Whether the Lead Level in Paint Exceeds the Standard

Although the techniques of taking 3 repeated measurements, and correcting for interference from the substrate, as described above, greatly improve the quality of the XRF reading, considerable measurement variability remains, especially at lead levels close to the standard of 1.0 mg/cm^2 . This makes it difficult to correctly classify paint with a lead level close to 1.0 mg/cm^2 . Two types of error are possible. The first is a false positive, i.e., classifying the paint as having a lead level above 1.0 mg/cm^2 , when it actually has a lead level below 1.0 mg/cm^2 . The second type of error is a false negative, i.e., a

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

failure to detect a lead level above 1.0 mg/cm^2 . The two types of errors have different consequences. False positives lead to unnecessary abatement, while false negatives may have serious health consequences for resident children.

To minimize the incidence of the two types of errors, the inspector should report his/her results to the PHA as follows. If a CLC of 1.6 mg/cm^2 or greater is obtained, then a positive reading is reported. If the CLC is below 0.5 mg/cm^2 , a negative is reported. For CLCs between 0.5 and 1.5 mg/cm^2 , the result is reported as ambiguous. As detailed in Chapter 4, the inspector should provide the PHA with a summary of his/her results, specifying, for each type of building component, the number tested and the number of positive, negative and ambiguous test results. This summary will be used by the PHA to decide on the need for further XRF testing, laboratory confirmation, or abatement.

Section 845. Appendix C. Testing for Lead Using Spectrum Analyzers

1) When a spectrum analyzer with energy resolution greater than (about) 3 KeV (FWHM @ 75 KeV) is used to store the paint "K" X-ray spectrum, it is helpful to record the sample information and the number of the stored spectrum. Also, "L" X-rays can be used for lead screening with a spectrum analyzer, provided that the analyzer has sufficient resolution to differentiate lead from other elements (zinc, copper, etc.) which could give false positive results. Screening with "L" X-rays provides a very rapid, non-destructive, semi-quantitative method. If lead "L" x-ray intensity indicates more than 1.0 mg/cm^2 of lead is present, the "K" x-ray intensity will indicate a much higher amount. The opposite is not true. "K" x-ray intensity should be used when quantitative analysis is desired. Sample sheets should be developed to accommodate this type of technology.

2) Instructions for Completing a LBP Inspection Form

Example LBP inspection forms are attached. These forms illustrate the kind of information that should be recorded by inspectors performing assays for lead in paint in buildings. Some of the information, such as number of doors, number of windows, number and types of rooms is important in estimating the extent of any abatement indicated by the results of the lead inspection.

Inspection forms have been developed in a spreadsheet format, Lotus 1-2-3, which performs calculations from the data obtained. A copy of the Lotus spreadsheet is available by sending a posted return envelope and a formatted $5 \frac{1}{4}$ inch, DS/DD, disc to: Mr. William McGuire, Buffalo Municipal Housing Authority, Modernization Department, 320 Perry Street, Buffalo, NY 14204 (Tel.: (716)855-7579).

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

COVER PAGE:

This page is designed to be a cover page for the entire unit to be inspected for LBP. The total number of rooms to be inspected should be noted. The number of pages which follow that are relevant to this specific unit should be indicated on this page. The inspector and XRF operators should be noted on this page. The inspector should initial this page and all pages that follow to certify the results of the inspection.

A map of the dwelling unit should be constructed and rooms numbered from left to right (clockwise) from the entry to ensure that the sampled surfaces can be located. Constructing such a map will assist in planning abatement of surfaces which are determined to be hazardous.

All XRFs which are used in the unit should be recorded by manufacturer and serial number. This is important when several different XRFs are used in a project and one breaks down during the inspection. It may be necessary to reinspect the units that were assayed by that XRF.

The sequence number of the unit inspection for that day should be recorded. In some cases the XRF zero may drift beyond manufacturers tolerances. If the zero is checked, hourly or at the beginning and end of each unit inspection, the effects of zero drift on XRF accuracy can be minimized.

Recording the starting time and the sequence number of the unit inspected and then recording the XRF samples in a numerical sequence in the order in which they were performed will allow the operator to establish what the maximum effect of the zero drift was during the time of the inspection. Each XRF should be standardized both before and after a unit inspection.

FRONT PAGE:

This page is designed to be a front page for a specific room inspected for LBP. The room should be indicated by a number consistent with the cover page numbering. A map of the room should be constructed in the space provided. The map should indicate closets, windows, doors, etc., by number. The purpose of the map is to clearly indicate where any lead hazard exists in the room. The number of windows and doors will be helpful in abatement planning if necessary. Each sampled spot should be indicated by number on the map. The number used must correspond to the number of the sample on the data recording portion of the forms.

Each XRF sample should be assigned a number chronologically sequenced which correlates to a number on the map of the room constructed at the beginning of the room inspection. Each sample number should be associated with a specific XRF. In the event that XRF malfunctions, it may be necessary to repeat the analysis on those samples with another, functioning, XRF. For example, if two XRFs are used, serial #213 and 147.4 then one can be noted as A on the COVER PAGE and the other B. The samples can then be numbered as A-1-1 for XRF "A" Room "1" XRF sample "1". Other numbering schemes are satisfactory as long as a specific XRF can be associated with a specific XRF sample.

Spaces are provided to record a maximum of 3 ALCs and 3 SELs per XRF sample for direct reading XRFs, the average of the readings, the calculated CLC (if necessary), and the results of the laboratory test on the paint films. Typically 3 readings are necessary, but 2 readings are sufficient if they are greater than 6 mg/cm². The result of at least one single read cycle is recorded and repeated 3 times in the same spot. Successive averages of multiple readings can also be recorded, provided that the single reading range can be derived from the readings to ensure that this range is less than or equal to 1.7 mg/cm².

Section 845. Appendix D. Recommended Setup and Use of a Negative Pressure Systema) Determining the Ventilation Requirements for Work Area

- 1) Experience with negative pressure systems on lead abatement projects indicates a recommended rate of one air change every 15 minutes. The volume (in ft³) of the work area is (in ft³/min) for the work area is determined by dividing this volume by the recommended air change rate (i.e., one air change every 15 minutes.)

Total ft³/min = Volume of work area (in ft³)/15 min

The number of units needs for the application is determined by dividing the total ft³/min by the rated capacity of the exhaust unit.

Number of units needed = [Total ft³/min]/[Capacity of unit (in ft³)]

b) Location of Exhaust Units

- 1) The exhaust unit(s) should be located so that makeup air enters the work area primarily through the decontamination facility and traverses the work area as much as possible. This may be accomplished by positioning the exhaust unit(s) at a maximum distance from the worker access opening or other makeup air sources.
- 2) Wherever practical, work area exhaust units can be located on the floor in or near unused doorways or windows. The end of the unit or its exhaust duct should be placed through an opening in the plastic barrier or wall covering. The plastic around the unit or duct should then be sealed with tape.
- 3) Each unit must have temporary electrical power (115V AC). If necessary, three-wire extension cords can supply power to a unit. The cords must be in continuous lengths (without splice), in good condition, and should not be more than 100 feet long. They must not be fastened with staples, hung from nails, or suspended by wire. Extension cords should be suspended off the floor and out of workers' way to protect the cords from damage from traffic, sharp objects, and pinching.

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

- 4) Whenever possible, exhaust units should be vented to the outside of the building. This may involve the use of additional lengths of flexible or rigid duct connected to the air outlet and routed to the nearest outside opening. Windowpanes may have to be moved temporarily.
- 5) If exhaust air cannot be vented to the outside of the building or if cold temperatures necessitate measures to conserve heat and minimize cold air infiltration, filtered air that has been exhausted through the barrier may be recirculated into an adjacent area. However, this is not recommended.
- 6) Additional makeup air may be necessary to avoid creating too high of a pressure differential, which could cause the plastic coverings and temporary barriers to "blow in." Additional makeup air also may be needed to move air most effectively through the work area. Supplemental makeup air inlets may be made by making openings in the plastic sheeting that allow air from outside the building into the work area. Auxiliary makeup air inlets should be as far as possible from the exhaust unit(s) (e.g., on an opposite wall), off the floor (preferably near the ceiling), and away from barriers that separate the work area from occupied clean areas. The should be resealed whenever the negative pressure system is turned off after removal has started. Because the pressure differential (and ultimately the effectiveness of the system) is affected by the adequacy of makeup air, the number of auxiliary air inlets should be kept to a minimum to maintain negative pressure. Figure L-2 presents examples of negative pressure systems denoting the location of HEPA-filtered exhaust units and the direction of air flow.

c) Use of the Negative Pressure System, Testing the System

- 1) The negative pressure system should be tested before any lead containing substrate is wetted, removed, or abated. After the work area has been prepared, the decontamination facility set up, and the exhaust unit(s) installed, the unit(s) should be started (one at a time). Observe the barriers and plastic sheeting. The plastic curtains of the decontamination facility should move slightly in toward the work area. The use of ventilation smoke tubes and a rubber bulb is another easy and inexpensive way to visually check system performance and direction of air flow through openings in the barrier. The measuring device must be sensitive enough to detect a relatively low pressure drop. A Magnehelic gauge with a scale of 0 to 0.25 or 0.50 inch of H₂O and 0.005 or 0.01 inch graduations is generally adequate. The pressure drop across the barrier is measured from the outside by punching a small hole in the plastic barrier and inserting one end of a piece of rubber or Tygon tubing. The other end of the tubing is connected to the "low pressure" top of the instrument. The "high pressure" tap must be open to the atmosphere. The pressure is read directly from the scale. After the test is completed, the hole in the barrier must be patched.

d) Replacement of Filters

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF PROPOSED AMENDMENTS

- 1) The HEPA filter should be replaced if prefilter and/or intermediate filter replacement does not restore the pressure drop across the filters to its original clean resistance reading or if the HEPA filter becomes damaged. The exhaust unit is shut off to replace the HEPA filter, which requires removing the prefilter first, then opening the intake grill of filter access, and finally removing the HEPA filter from the unit. Used HEPA filters should be placed in a sealable plastic bag (appropriately labeled) and disposed of as lead waste. A new HEPA filter (structurally identical to the original filter) should then be installed. The intake grill and intermediate filter should be put back in place, the unit turned on, and the prefilter positioned on the intake grill. Whenever the HEPA filter is replaced, the prefilter and intermediate filter should also be replaced.
- 2) When several exhaust units are used to ventilate a work area, any air movement through an inactive unit during the HEPA filter replacement will be into the work area. Thus, the risk of lead dust released to the outside environment is controlled.
- 3) Any filters used in the system may be replaced more frequently than the pressure drop across the filters indicates is necessary. Prefilters, for example, may be replaced two to four times a day or when accumulations of particulate matter become visible. Intermediate filters must be replaced once every day or so, and the HEPA filter may be replaced at the beginning of each new project. (Used HEPA filters must be disposed of as lead containing waste.) Conditions in the work area dictate the frequency of filter changes. In a work area where dust release is effectively controlled by thorough wetting and good work practices, fewer filter changes may be required than in work areas where the removal process is not well controlled. It should also be noted that the collection efficiency of a filter generally improves as particulates accumulate on it. Thus, filters can be used effectively until resistance (as a result of excessive particulate loading) diminishes the exhaust capacity of the unit.

e) Dismantling the System

When a final inspection and the results of final air tests indicate that the area has been decontaminated, all filters of the exhaust units should be removed and disposed of properly and the units shut off. The remaining barriers between contaminated and clean areas and all seals on openings into the work area and fixtures may be removed and disposed of as contaminated waste. A final check should be made to be sure that no dust or debris remain on surfaces as a result of dismantling operations.

Section 845 Appendix E: Number and Location of Soil Samples

Many different configurations of the dwelling exterior are likely to be encountered in the field, so that only general guidance can be given on the number and location of soil samples to be taken.

First, prepare a site description. Make a detailed drawing showing the boundary of the lot; the position of the main building and any other structures such as garages and storage sheds; the position of the sidewalks, driveways, and other paved areas; the position of the play areas (if clear); and the position of areas with exposed soil, roof rain spouts, and general drainage patterns.

In addition to the diagram, describe the location of the property and include the following information:

- Type of building construction;
- Condition of main building;
- Condition of the property and nature of adjacent property;
- Fencing and animals on the property;
- Apparent use of the property (e.g., used as a play area).

Soil samples should be taken with a tool, such as a spatula, which can easily be decontaminated with a wipe after each use. Use a new wipe prior to taking a new sample.

Soil cores may be combined to form one sample for each side of the dwelling, building or structure. If the building is 50 feet long, 5 soil cores shall be taken. They may then be combined to form one sample for analysis. Soil sample cores shall only be combined with sampling cores from the same side of the dwelling, building or structure. Specific areas around the dwelling, building or structure which appear to be play areas shall be sampled, labeled, and kept separate from other samples.

Samples should be placed in a whirl-pak plastic bag. The bag should be labeled as to where the soil sample was obtained. (For example; the east side of the house) and sealed. Record each sample location on the diagram. Submit samples for analysis or provide a Spectrum Analyzer reading for the specific area tested. Record results from the analysis.

Section 416.30 Pool Calculations

The Pick Four and Pick Five pari-mutuel pools shall be calculated as follows:

Section 417.10 Pick Six

A Pick Six Wager combines the winners of six consecutive races. All Pick Six wagers will be calculated in a pool which is entirely separate from all other wagering pools. "Pick Six races" shall mean the six consecutive races designated for the Pick Six.

Section 417.20 Entries and Fields

Entries and fields may race in Pick Six races, unless they are prohibited by other Board rules relating to other types of multiple wagering rules. Section 417.30 Pool Calculations

The Pick Six pari-mutuel pool shall be calculated as follows:

a) Major Pool: Seventy-five percent (75%) of the net amount in the pool shall be distributed equally to the holders of pari-mutuel tickets which correctly designate the most official winners of the Pick Six races.

b) Minor Pool: Twenty-five percent (25%) of the net amount in the pool shall be distributed equally to the holders of pari-mutuel tickets which correctly designate the second greatest number of official winners of the Pick Six races.

c) Consolation Pool: If a ticket designates as the selection to win in any one or more of the Pick Six races, a single wagering interest which is scratched or excused by the stewards or which is prevented from racing because of the failure of the stall doors of the starting gate to open or which is otherwise determined to be a non-starter in the race for which selected, the value of that ticket shall be withdrawn from the Major and Minor Pick Six pools. The total net value of all such withdrawn pools shall be distributed equally as of consolation among the holders of such withdrawn Pick Six tickets which have a total of winnings and scratched selections, including at least one winner, to have qualified for at least the minor pool. However, if such ticket is entitled to participate in the Major or Minor Pool outlined above, it will not be withdrawn from that pool. For example: If "75" = Major Pool and "25" = Minor Pool and "C" = consolation pool, and if some tickets holders have chosen 6 winners, the pools could be constituted as follows:

	0	1	2	3	4	5	Total # of Scratches
Total			C	C			
of			C	C			
Winners			C	C			
5			C				
6							
25-25

TEACHERS' RETIREMENT SYSTEM OF THE STATE OF ILLINOIS

NOTICE OF PROPOSED AMENDMENTS

Addresses differences in procedures required by the distinct status of the overpayment recipient -- whether (a) an ongoing benefit recipient, (b) a former benefit recipient who is currently a contributing or inactive member, (c) a deceased benefit recipient, or (d) any case where offsets against future benefits are not available because no future benefits are payable.

- 1650.410 Clarifies provisions governing refunds for duplicate service, to show that noncreditable service as well as duplicate service results in a refund, and that the refund can be made not only at retirement to the member, but also at death to the member's beneficiaries.
- 1650.450 Clarifies salary rule as to qualifying deferred compensation.
- 1650.460 Shows the addition of a section, but the section is actually only moved from subpart governing membership and service credits to subpart governing contribution credits and payments. See Section 1650.370, above.

- f) When an individual claiming occupational disability benefits is employed under an agreement for less than 12 full months, the utilization of sick leave requirement in subsection (e) is not satisfied during periods not covered by the agreement. Section 1650.230 Medical Examinations and Investigations of Claims

- a) Each member seeking a disability benefit, occupational disability benefit, or a disability retirement annuity shall provide the System with written reports by two or more licensed and practicing physicians certifying that the member is disabled and unable to properly perform the duties of his or her position. Provided, however, in the case of disability due to pregnancy, the member shall provide the System with a written report by one licensed and practicing physician certifying that she is disabled and unable to perform the duties of her position.
- b) In order to substantiate the member's or the annuitant's continued eligibility for a disability benefit, occupational disability benefit, or a disability retirement annuity, the System shall require that the member or annuitant submit to additional medical examinations and shall request hospital records; Department of Employment Security earning statements; Social Security benefit payment information; income tax records; and other pertinent information, under the following circumstances:
 - 1) There is disagreement among examining physicians;
 - 2) The medical examinations were inadequate to substantiate continued disability. A medical examination is considered inadequate when:
 - A) a report is incomplete; or
 - B) a report was not completed within the last three months; or
 - C) the duration of disability is shorter than the period between the date of the medical examination and the date of the submittal of the report.
 - 3) There is evidence an impartial medical examination was not performed. An impartial medical exam is not performed when the physician is:
 - A) related to the teacher; or
 - B) a friend of the teacher.
 - 4) There is a reasonable basis to believe the member is no longer disabled. A reasonable basis exists when:
 - A) the System receives statements-by-third-parties information that the teacher was engaged in activities which would be prohibited by his or her stated disability; or
 - B) the System receives inquiries by teachers receiving a disability benefit, disability retirement annuity or occupational disability benefit regarding the work which they may perform.

- 5) The member is found to be gainfully employed. The term "gainfully employed":
- A) shall be construed to mean:
 - i) any compensation which exceeds \$500 in any month for personal services, including fees, wages, salary, commissions, and similar items; and
 - ii) any income which exceeds \$500 in any month derived from the participation in a business activity through the performance of physical and/or mental activities generally performed for the production of income; and
 - B) shall be computed on a gross rather than net basis (i.e., no deduction of any kind including but not limited to deductions for losses, expenses, taxes or withholding will be considered in such computation); and
 - C) shall be computed either on a monthly or on an annual basis; that is: more than \$500 compensation earned in a month results in a loss of eligibility for that month; more than \$6,000 compensation earned in a year results in loss of eligibility for that year.
- Members or annuitants in receipt of a disability benefit or occupational disability benefit shall be requested to submit to medical examinations at least once each year. When a disability benefit terminates, and a member requests retirement on a disability retirement annuity, the member shall submit to a medical examination, unless the member was examined within the preceding six months, in which case no new medical examinations are required. The System retains the right to require members or annuitants to submit to medical examinations by physicians selected by the System, at its own expense. These examinations may be in addition to the written reports tendered by the member or the annuitant. Such examinations shall be required when prior medical examinations were inadequate, when there is a question regarding the independence of the physician or when the forms are not completed properly or there is a reasonable basis to believe the member is no longer disabled (based on the factors set out in subsection (b)(4) of this Section).
- e) Failure of a member or an annuitant to submit to medical examination, or to provide the information required pursuant to Sections 16-149 through 16-149.2 of the Act shall result in suspension of payments.

Section 1650.240 Refunds; Impermissible Refunds; Canceled Service; Repayment

- a) Any member eligible to receive a refund of contributions pursuant to the provisions of Section 16-151 of the Act shall, if he or she so elects, make a written request therefor upon a form prescribed by the System. A refund is deemed accepted and membership in the System terminates upon the cashing of a refund warrant or the escheat of a warrant.
- b) To be credited toward the calculation of a retirement annuity, survivor's benefit, or disability benefit, the service canceled by such refund must have been re-established in accordance with the provisions of the Act, by repayment of the member's retirement, including statutory interest, prior to the member's retirement, death, or commencement of disability benefits.
- c) Whenever the System determines that there has been a refund not in accordance with the provisions of the Act (an "impermissible refund"), whatever the reason, it shall record such refund as an optional service receivable, with interest at the statutory rate accruing on any unpaid balance from date of refund until date of repayment, and shall notify the member of the amount due.
- d) A member who received an impermissible refund, who does not wish to re-establish the service canceled thereby, may retire without paying the amount due but is barred from making repayment and adding the service credit after retirement.

- 1) If the amount of compensation received is less than the monthly benefit provided under the Illinois Pension Code, only the amount of the excess of such monthly benefit over the amount of such compensation shall be payable by the System. If the amount of compensation received equals or exceeds the monthly benefit provided under the Illinois Pension Code, no benefit shall be payable by the System during the period compensation is paid under the Workers' Compensation Act or Workers' Occupational Diseases Act. If the compensation for disability or death is received in a commuted lump sum or partly in a commuted lump sum and partly in monthly or weekly sums, the System shall, for offset purposes, consider the compensation as if it had been paid at a weekly rate as prescribed under the Workers' Compensation Act or Workers' Occupational Diseases Act. In the event the whole or any part of the benefits received under the Workers' Compensation Act or Workers' Occupational Diseases Act is commuted into one sum, the aggregate sum of the benefits so commuted and not the commuted value thereof shall be used for purposes of ascertaining the amount of offset.
- 2) The amount considered for offset purposes shall not be reduced by any legal expenses granted from the award to the member.
- 3) An offset shall not be applied to medical expenses paid on behalf of or to the claimant.
- 4) Whenever the System determines that benefits other than a refund of contributions under Section 151 of the Act should not have been paid have been paid erroneously or in an excess amount, for any amount due in one payment or to repay the amount due within a period of time and according to terms negotiated by the parties considering whether fraud or error resulted in the payments, the financial ability of the recipient and the life expectancy of the recipient, record such payment as an overpayment and notify the payee or other person from whom repayment is expected of the amount due. For any overpayment exceeding \$25, the System shall establish a receivable on the books of the System, with interest to accrue at the statutory rate beginning on the first day of the month following 30 days from date of notification by the System, to be collected in accordance with the following criteria:
 - 1) Overpayment to benefit recipient. The amount owed must be repaid to the System in a lump sum or by offset against monthly benefits; however, the payment schedule shall not exceed sixty months. Minimum monthly payments will be set according to the following scale based on monthly benefit level:
 - A) If the benefit recipient's gross monthly benefit is \$1,000 or less, the minimum monthly payment by offset is equal to 5% of the gross;
 - B) If the benefit recipient's gross monthly benefit is more than \$1,000 but less than \$2,501, the minimum monthly payment by offset is equal to 7.5% of the gross;
 - C) If the benefit recipient's gross monthly benefit is \$2,501 or more, the minimum monthly payment by offset is equal to 10% of the gross.
 - 2) Overpayment to current contributing or inactive member. The amount owed must be repaid in a lump sum, in monthly payments by check or money order, or by offset against future benefits payable to the overpaid individual (unless the overpayment is required to be collected from the individual's beneficiaries, in which case it will be collected according to the terms of paragraph (3) of this subsection (b)). If by offset against the overpaid individual's future benefits, at the time the benefits become payable the minimum monthly payments will be determined according to the scale and schedule set forth in subparagraphs (1)(A) through 1(C) of this subsection (b). Overpayment to benefit recipient now deceased, to be collected from beneficiaries.
 - A) If the beneficiary is the recipient of monthly benefits, the amount owed must be repaid in the same manner, involving the same payment options, as the schedule of repayments for overpaid contributing or inactive members, set forth in paragraph (2) of this subsection (b); provided, however, that no payment schedule may exceed the projected life of the benefit entitlements. For example, if the beneficiary is a minor child, the repayment must be completed before the beneficiary reaches majority.
 - B) If the beneficiary is the recipient of a lump-sum benefit only, the System will impose a full offset, up to and including, if necessary, the full amount of the lump-sum benefit.
 - 4) Overpayment to nonmember or in any other situation where there are no future benefits available or the future benefits are insufficient for a full repayment of the overpaid amount. The System will pursue collection through any available means, including seeking the assistance of the Attorney General, the Debt Collection Bureau, or private collection agencies.

- 1) If the amount of compensation received is less than the monthly benefit provided under the Illinois Pension Code, only the amount of the excess of such monthly benefit over the amount of such compensation shall be payable by the System. If the amount of compensation received equals or exceeds the monthly benefit provided under the Illinois Pension Code, no benefit shall be payable by the System during the period compensation is paid under the Workers' Compensation Act or Workers' Occupational Diseases Act. NOTICE OF PROPOSED AMENDMENTS

Section 1650.450 Definition of Salary

- a) Any emolument of value recognized by the System that is received, actually or constructively, by a member in consideration for services rendered as a teacher, within all applicable limits and restrictions on qualified pension plans contained in the Internal Revenue Code, 26 U.S.C., at §401(a) et seq. Subsection (b) of this Section lists the more common elements of compensation that are recognized by the System as "salary," for purposes of illustration. For further illustration, subsection (c) mentions several examples of items not recognized by the System as "salary." However, "salary" within the meaning of Section 16-121 of the Act is not limited to the items so enumerated.

- b) Examples of salary amounts to be reported to the System include:
- 1) The gross amount of wages or compensation earned or accruing to the member during the legal school term or the length of his or her employment agreement, whichever is greater, in a function requiring certification as a teacher, and payable by the employer at termination of service;
 - 2) Wages or compensation for overtime or extra service;
 - 3) The amount payable, exclusive of court costs, attorney's fees and punitive damages, as a result of a settlement or judgment obtained due to a disputed dismissal, suspension or demotion; provided that the salary amount reported to the System under this subsection shall be equal to that which the member would have earned had the dispute not occurred.
 - 4) Severance pay e.g., retirement incentives, lump sum bonuses, payments for unused vacation and sick days) received by member or becoming due and payable to member prior to or concurrent with receipt of final paycheck for regular earnings;
 - 5) Contributions made by or on behalf of the member to deferred compensation plans, salary reduction plans or tax sheltered annuities; and
 - 6) Amounts that would otherwise qualify as salary and wages under (b)(1) through (b)(5) of this subsection but are not received directly by the member because they are used to finance benefit options in a flexible benefit plan; provided, however, that to be reportable, a flexible benefit plan must be available to all teachers on a non-discriminatory basis and cannot include non-qualifying deferred compensation.
- c) Examples of amounts not to be reported to the System include:
- 1) Any severance payment (e.g., retirement incentives, lump sum bonuses, payments for unused vacation and sick days) becoming due and payable to member subsequent to receipt of final paycheck for regular earnings;

TEACHERS' RETIREMENT SYSTEM OF THE STATE OF ILLINOIS

- 2) Any lump sum payment made after the death of the member;
- 3) Expense reimbursements, expense allowances, or fringe benefits unless included in a reportable flexible benefit plan;
- 4) Any monies received by the member under the Workers' Compensation Act or the Workers' Occupational Diseases Act;
- 5) Any amount paid in lieu of previously nonreportable benefits or reported in lieu of previously non-reported compensation where the conversion occurs in the last years of service and one of the purposes is to increase a member's average salary. If the member's non-creditable or non-reported compensation in any of the last seven creditable school years of employment exceeds that of any other subsequent year, the System will presume the difference, unless resulting from the terms of a collective bargaining agreement, to have been converted into salary and wages in the subsequent year for the purpose of increasing final average salary. To overcome the presumption, the member must submit documentary evidence to the System which clearly and convincingly proves that none of the purposes of the change in compensation structure was to increase average salary (for example, collectively bargained agreements, change of employer, change in family status);
- 6) Any amount paid by an employer as the employer's one time contribution (or on behalf of the employee as the employee's one-time contribution) required by the System as part of the statutory early retirement option in Section 16-133.2 of the Act; and
- 7) Options to take salary in lieu of employment-related expense allowances or reimbursements.

Section 1650.460 Calculation of Average Salary

- a) The member's annual salary rate shall be used by the System when calculating average salary. Provided, however, if a member receives less than one year of service credit in any school year, salary shall consist of creditable earnings.
- b) The highest four consecutive school years of service within the last ten years of creditable service shall be deemed the four highest consecutive credit years posted to the member's account. Provided, however, if a member is credited with less than one school year, the System shall use partial consecutive years to establish four consecutive years of salary.

SOURCE: Adopted July 24, 1992, at 16 Ill. Reg. 12416, effective _____.

Section 307.10 Purpose

Section 31 of the Illinois Banking Act ("Act") was amended in November, 1989, to permit Illinois state banks to purchase troubled and failed banks and savings associations from the Resolution Trust Corporation ("RTC") and the Federal Deposit Insurance Corporation ("FDIC"). Subsections (a)-(d) of Section 31 of the Act authorize a state bank to acquire the assets of or merge with an eligible depository institution. Subsection (e) of Section 31 of the Act exempts a state bank from the Act's numeric and geographic branching limitations when acquiring the former main banking premises, main office, branch or branches of an eligible depository institution.

Section 31(e)(5) of the Act also exempts a state bank from the Act's numeric and geographic branching limitations if it acquires the former main banking premises, main office, branch or branches of an eligible depository institution through a consortium bid from a lead purchaser within thirty days after that lead purchaser acquired the former main banking premises, main office, branch or branches from the eligible depository institution or its receiver. However, it is the practice of the RTC and FDIC to transfer titles or leases to the lead purchaser only after the other assets and liabilities of an eligible depository institution have been transferred to the lead purchaser, giving rise to the question of whether consortium members may begin doing business prior to the transfer of the title or lease. This Part clarifies that a state bank in the consortium may operate these locations before the transfer of the titles or leases to the lead purchaser and defines when a main banking premises, main office, branch or branches is deemed to be "acquired" by the lead purchaser.

Section 307.20 General Rule

- a) A state bank may begin operating the former main banking premises, main office, branch or branches of an eligible depository institution when the bank has received transfer of the majority of assets and

Section 950.140 Opinion of Certified Public Accountant (Repealed)

a)

Prequalification ratings shall be computed using financial statements prepared in accordance with the generally accepted accounting principles established by the American Institute of Certified Public Accountants (AICPA). The meaning of generally accepted accounting principles is defined in Statement on Auditing Standards No. 43: Omnibus Statement on Auditing Standards, AICPA, August, 1992. In making all determinations with regard to certified financial statements, the Board shall be guided by the auditing standards of the AICPA set forth in subsection (b) of this Rule. In the event the licensed Certified Public Accountant (CPA) does not render an unqualified opinion, the procedure shall be as follows:

1) ~~Qualified Opinion~~—A qualified opinion from a Certified Public Accountant may be utilized for prequalification purposes subject to the elimination from the balance sheet of the amounts qualified by the accountant. The decision whether to treat the opinion as qualified is made by a Board staff accountant based on information included in the financial statement which was the basis of the disclaimer.

2) ~~Adverse Opinion~~—If an adverse opinion is rendered by a Certified Public Accountant which indicates the financial statements examined do not present a fair or accurate statement of the contractor's financial condition, the statements referred to in such opinion shall be considered as unaudited and will preclude prequalification of the contractor.

3) ~~Disclaimer of Opinion~~—If a Certified Public Accountant issues a disclaimer of opinion the Board shall review and evaluate the materiality of the effects of such disclaimer for prequalification purposes and, based upon that review/evaluation, may consider the disclaimer to have the effect of a qualified opinion or an adverse opinion as previously described in this Section. When the disclaimer arises due to client imposed restrictions on the Certified Public Accountant's scope of work, the Board may consider the opinion as qualified for those areas of the balance sheet where scope restrictions prevented an opinion being rendered.

CAPITAL DEVELOPMENT BOARD

NOTICE OF ADOPTED AMENDMENTS

When the disclaimer arises due to conditions beyond the control of the client which prevent the Certified Public Accountant from determining the overall fairness of the financial statement, the Board shall consider the financial statement to be unaudited and the terms of Section 950.300 shall apply. When the disclaimer arises due to client imposed restrictions which prevent the Certified Public Accountant from determining the overall fairness of the financial statement, the Board shall consider the opinion to be an adverse opinion.

- 4) If the Certified Public Accountant's opinion results in a negative rating, the contractor's financial statement shall be treated as unaudited for purposes of establishing a prequalification rating, and terms set forth in Section 950.300 shall apply.

- b) The Board shall be guided by the following AICPA auditing standards:

General Standards

- 1) The examination is to be performed by a person or persons having adequate technical training and proficiency as an auditor.
- 2) In all matters relating to the assignment, an independence in mental attitude is to be maintained by the auditor or auditors.
- 3) Due professional care is to be exercised in the performance of the examination and the preparation of the report.

- e) Standards of Field Work

- 1) The work is to be adequately planned and assistants, if any, are to be properly supervised.
- 2) There is to be proper study and evaluation of the existing internal control as a basis for reliance thereon and for the determination of the resultant extent of the tests to which auditing procedures are to be restricted.
- 3) Sufficient competent evidential matter is to be obtained through inspection, observation, inquiries, and confirmations to afford a reasonable basis for an opinion regarding the financial statements under examination.

- d) Standards of Reporting

CAPITAL DEVELOPMENT BOARD

NOTICE OF ADOPTED AMENDMENTS

- 1) The report shall state whether the financial statements are presented in accordance with generally accepted accounting principles.
- 2) The report shall state whether such principles have been consistently observed in the current period in relation to the preceding period.
- 3) Information disclosures in the financial statements are to be regarded as reasonably adequate unless otherwise stated in the report.
- 4) The report shall either contain an expression of opinion regarding the financial statements taken as a whole or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefore should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear indication of the character of the auditor's examination, if any, and the degree of responsibility assumed by the auditor.

Section 950.150 Contractor Misrepresentation (Repealed)

If any contractor knowingly makes a material misrepresentation in submitting information which causes the Board to issue a financial prequalification rating which is higher than it would otherwise be, such misrepresentation will be sufficient grounds for suspending a contractor from bidding for not more than one year.

(Source: Repealed at 16 Ill. Reg. 12424, effective July 28, 1992)

Section 950.160 Supplemental Information (Repealed)

When the valuation or classification of an item may have a material effect on the prequalification rating, the contractor shall be requested to furnish supplemental information certified by the Certified Public Accountant who signed the accountant's certificate. When the information contained in the financial statement is not sufficient to determine whether the valuation or classification of an item will have a material effect on the prequalification rating, the contractor shall be requested to furnish supplemental information certified by the Certified Public Accountant who signed the accountant's certificate.

Section 950.210 Temporary Financial Prequalification (Repealed)

a) In the following cases, the Executive Director may issue a temporary financial prequalification rating to a contractor pending submission of the certified financial statement required by Section 950.130. Factors considered in determining whether a temporary financial prequalification rating will be issued include past performance on Board projects, quality of work, fair employment compliance history and timeliness of completion of prior projects. The contractor's application must include the financial statement to be audited and all the information required by paragraphs (1) through (6) below.

- 1) Contractor initially states his/her intent to obtain a certified financial statement within ninety days;
- 2) Contractor is in the process of changing his/her fiscal year;
- 3) Contractor is changing the Certified Public Accountant who will perform the audit;
- 4) Contractor has been granted an extension by the Internal Revenue Service for filing taxes;

CAPITAL DEVELOPMENT BOARD

NOTICE OF ADOPTED AMENDMENTS

b) A temporary financial prequalification request shall be denied under the following circumstances:

- 1) The contractor in the past has requested a temporary financial prequalification rating and then failed or refused to provide the certified financial statement required by Section 950.130;
- 2) Evidence exists that the certified financial statement may differ substantially from the financial statement submitted. A substantial difference is a discrepancy in figures which indicates that the unaudited financial statement does not accurately reflect the financial position of the business.

Section 950.220 Term of Temporary Financial Prequalification Rating (Repealed)

(Source: Repealed at 16 Ill. Reg. 12424, effective July 28, 1992)

Section 950.230 Fraudulent Statement of Intent (Repealed)

a) If the Board shall determine that the contractor's statement of intent requesting a temporary financial prequalification rating was fraudulent or if the contractor fails to provide the required certified financial statements by the term of the temporary financial prequalification ratings, the Board may terminate any contract which may have been awarded to the contractor during the existence of the temporary financial prequalification rating, and the contractor shall have no right to any compensation thereunder for any work that may have been performed prior to termination. Said contractor shall be ineligible for future prequalification for a period of one year from the date of notification. The Board shall apply the following criteria when determining whether a contract shall be terminated:

- 1) The nature of the violation;
- 2) The amount of work performed under the contract;
- 3) The additional costs to the State if the contract is terminated.

CAPITAL DEVELOPMENT BOARD
NOTICE OF ADOPTED AMENDMENTS

- 4) The length of delay which would result, and
 - 5) Any other factor which is relevant and ought to be considered.
- b) In applying these criteria the Board shall consider the magnitude of the work remaining to be performed, the financial stability of the contractor, the apparent ability of the contractor to complete the contract on schedule, the quality of the contractor's work already performed and the economic detriment likely to accrue to the People of the State of Illinois if the contract is terminated. Apparent ability includes such factors as work force, including persons qualified to supervise the work to be done, and office support staff.

Section 950.240 Formula for Prequalification Rating (Repealed)

The contractor's prequalification rating shall be determined by the following procedure:

- a) Financial data shall be analyzed and the preliminary rating shall be calculated by applying the formula:

$$\begin{aligned}
 & \text{Total current assets} \\
 & \text{Less Current liabilities} \\
 & \text{Equals Net Working Capital (NWC)} \\
 & \text{NWC } \$ \text{ } 0 \text{ to } \$200,000 \times 10 = \\
 & \text{NWC } \$200,001 \text{ to } \$500,000 \times 15 = \\
 & \text{NWC } \$500,001 \text{ and above } \times 20 = \\
 & \text{Net Worth} \\
 & \text{Less NWC} \times \\
 & \text{Balance} \times 5 = \\
 & \text{Preliminary Rating (i + ii)} \\
 & \text{* If NWC is a negative number, zero will be substituted for NWC.}
 \end{aligned}$$

- b) Pursuant to Section 950.250 the preliminary rating established under paragraph (a) above may be subject to a twenty percent (20%) increase or decrease as the final step in the determination of the prequalification rating. The decision will be based on the factors set forth in Section 950.250. The contractor's performance history is the most important factor considered.

Section 400.60 Accessibility

The Commission shall ensure that all stages of its grievance procedure are readily accessible to and usable by individuals with disabilities.

Section 400.70 Case-by-case Resolution

Each grievance involves a unique set of factors including the nature of the disability, the otherwise applicable eligibility requirements, the benefits to be derived, the nature of the agency service, program or activity at issue, the health and safety of others, and whether an accommodation would constitute a fundamental alteration of the program, service or activity or an undue hardship to the Commission. Section 1501.114 Recognition

a) Recognition Provisions

- 1) Recognition Status. A district will be granted a status of recognition continued, recognition continued-with conditions, or recognition interrupted.
- 2) Effect of Recognition Continued. A district which has been granted the status of recognition continued will be entitled to receive ICCB grants for which it is otherwise entitled and eligible.
- 3) Effect of Recognition Continued-With Conditions. A district which has been assigned the status of recognition continued-with conditions will be entitled to receive ICCB grants for which it is otherwise entitled and eligible, but it will be given a specified time to resolve the conditions which led to its assignment to that status. A follow-up visit will be scheduled not sooner than three nor later than nine months after ICCB action on the assignment to determine the district's progress in resolving the conditions.

- 4) Effect of Recognition Interrupted. A district which has been assigned a status of recognition interrupted may apply for recognition at such time as all requirements set forth by the ICCB have been satisfied. A district on recognition interrupted status will have state funding suspended on a prorata, per diem basis for the period of time for which such status is in effect.
- 5) Recognition Action. Recognition is considered to be continuous unless action is taken to interrupt it. The ICCB will act on the recognition status of each district at a meeting subsequent to the ICCB recognition report being received. A district which previously has not been granted a recognition status by the ICCB may apply for a recognition status at any time. A district which has the status of recognition continued shall apply for continuation of that status at least thirty days prior to a scheduled recognition team visit.

- b) Evaluation. The ICB staff recognition team will conduct an on-site evaluation of each district at least once every five (5) years. Additional or alternate focused visits may be scheduled to review circumstances of alleged gross noncompliance with ICB standards. The purpose of the evaluation will be to determine compliance with ICB standards. No district will be assigned a recognition status without having received a prior on-site evaluation. A district will receive a draft report of the recognition team's findings no later than thirty (30) days after an on-site visit. A final report will be presented to the ICB at its next regularly scheduled meeting and will include the district's responses to the draft report's findings. Accompanying the final report will be the evaluating team's recommendation for recognition status.

- c) Review and Appeal. The ICOB may place a district on a recognition interrupted status for failure to meet ICOB standards after being assigned a status of recognition continued-with conditions and receiving a follow-up visit if the district has not resolved the conditions within the stated time allowed. Any district whose recognition is interrupted may file a written request with the ICOB for a hearing on the decision in accordance with Section 1501.110. Pending the hearing and decision, any consequences of recognition interrupted will be suspended.

- d) Recognition Standards. The recognition standards by which a district will be evaluated for recognition purposes will be the applicable statutes within the Public Community College Act and the applicable ICCB rules.

 For the purpose of this Rule, Illinois Temporary Registration Permit (hereinafter referred to as Temporary Permit) shall refer to a temporary card issue or provided by the Secretary of State, which allows the operation of a vehicle after proper application has been made and fees received, until the receipt of registration plates and/or sticker.
 The Secretary of State shall prescribe the form and content of the Temporary Permit. The Secretary of State shall issue the Temporary Permit and no other document shall be deemed a valid Temporary Permit. This provision shall in no way be construed as restricting the provisions of Section 3-401 of the Illinois Vehicle Code.
 The Temporary Permit shall not be valid for more than 60 days from the date of issuance, unless extended or reduced at the discretion of the Secretary of State. In exercising that discretion, the Secretary of State shall take into consideration the following factors:

- A) The nature and type of application;
 B) The availability of the registration plates and/or stickers applied for;

- C) The processing time for the application;

- D) Other relevant matters affecting the issuance thereof.

In any event, once the applied-for registration plates and/or stickers have been issued to and received by the applicant, the Temporary Permit is void.

The Temporary Permit must be displayed on the windshield of the vehicle for which it is issued and must be removed upon receipt of the registration plates and/or sticker. The Temporary Permit is not transferable from one person to another, nor from vehicle to vehicle.

In addition to the issuance of Temporary Permits to specific applicants, the Secretary of State shall issue, upon request, blank Temporary Permits to the following for completion by them:

All Remittance Agents receiving such permits shall maintain records thereof as prescribed in Section 3-910 of the Illinois Vehicle Code. Failure to do so could result in the denial, revocation, or suspension of a Remittance Agents license under section 3-906 and Section 3-907 of the Illinois Vehicle Code.

SUBPART A: PROMULGATION

Section 1285.10 Purpose

The purpose of this Part is to provide procedures and define responsibilities for the collection of body fluid samples from certain sex offenders. These samples are required by law to be collected to enable genetic marker grouping analysis and indexing. The results shall be available for future criminal investigations and other forensic analysis purposes. Genetic marker grouping analysis and indexing may include, but is not limited to, those procedures known as DNA profiling, DNA indexing, and other processes used to identify distinctive genetic characteristics.

Section 1285.20 Definitions

Unless specified otherwise, all terms shall have the meaning set forth in Section 5-4-3 of the Unified Code of Corrections (Ill. Rev. Stat. 1991, ch. 38, par. 1005-4-3). For purposes of this Part, the following additional definitions apply:

DEPARTMENT OF STATE POLICE

NOTICE OF ADOPTED RULES

"Kit" means the Genetic Marker Indexing Kit provided by the Department.

"Qualifying offender" means any person as described at Section 5-4-3(a) of the Act.

"Sample" means specimens of blood collected from a qualifying offender.

SUBPART B: OPERATIONS

Section 1285.30 Responsibilities

a) When a person becomes a qualifying offender, the State's Attorney shall, at the time of sentencing, request that the court issue an order requiring the qualifying offender to comply with Section 5-4-3(a) of the Act.

b) At the time of sentencing the qualifying offender, the sentencing judge shall issue an order requiring the offender to provide specimens of blood which shall be submitted to the Department in accordance with Section 5-4-3(a) of the Act.

c) The designated agency responsible for sample collection of qualifying offenders is as follows:

- 1) The sheriff's office in the county where the qualifying offender is sentenced is the designated agency and is responsible for the sample collection within the time limit specified by statute.
- 2) If the qualifying offender has not previously had a sample collected and is serving a term of incarceration in a facility under the control of the county sheriff, the sheriff's office is the designated agency and is responsible for the collection of the sample prior to the release of the offender.
- 3) If the qualifying offender has not previously had a sample collected and is transferred to a facility under the control of the Department of Corrections to serve a term of incarceration, the Department of Corrections is the designated agency and is responsible for the collection of the sample within 45 days after receiving the offender.
- 4) If the qualifying offender has not previously had a sample collected and is serving a term of incarceration in a facility under the control of the Department of Corrections, the Department of Corrections is the designated agency and is

- d) In the event no court order has been issued at the time of sentencing requiring the qualifying offender to provide a sample, the designated agency shall request the State's Attorney of the county in which the offender is located to request the court to issue such an order. The court shall issue an order requiring the offender to provide the sample.
- e) If the offender voluntarily consents to provide the sample, no court order is necessary.

AUTHORITY: Implementing and authorized by the Airport Zoning Act (Ill. Rev. Stat. ~~1901~~ 1991, ch. 15 1/2, par. 48.1 et seq.).

SOURCE: Emergency rule adopted March 9, 1977; codified at 6 Ill. Reg. 15271; amended at 16 Ill. Reg. 12601, effective July 27, 1992.

Section 44.30 Surfaces and Height Limitations

- a) Establishment and Creation
- 1) The following airport imaginary surfaces are established with relation to the airport and to each runway. The size of each such imaginary surface is based on the category of each runway according to the type of approach available or planned for that runway. The slope and dimensions of the approach surface applied to each end of a runway are determined by the most precise approach existing or planned for that runway end.
 - 2) Such airport imaginary surfaces are hereby created and established, in order to carry out the

DEPARTMENT OF TRANSPORTATION
NOTICE OF ADOPTED AMENDMENTS

provisions of these zoning regulations. Such surfaces shall include all of the land lying within the horizontal surface, conical surface, primary surface, approach surface (to include non-precision instrument approach, precision instrument approach and visual approach), transitional surface and circling approach surface. These surfaces are shown on the Airport Zoning Map for Effingham County-Memorial Freeport Albertus Airport consisting of two (2) sheets, prepared by William J. Murray and Associates James F. Gastel, Consulting Engineer, and dated July 3, 1973- September 28, 1976, and referred to hereinafter as the zoning map (Note: this zoning map can be viewed at the Department of Transportation, Division of Aeronautics, Capital Airport, Springfield, Illinois, 62706 62707-8415.) An area located in more than one of the following surfaces is considered to be only in the surface with the more restrictive height limitation.

- 3) Except as otherwise provided in these zoning regulations, no structure or growth shall be erected, altered, allowed to grow, or maintained in any surface created by these zoning regulations to a height in excess of the height limit herein established for such surfaces.
- 4) The various surfaces described in subsections (b) through (h) are hereby established, and height limitations are established in those subsections for each of the surfaces.

b) Horizontal Surface

- 1) A horizontal plane 150' above the established airport elevations of 847' above mean sea level (AMSL), the perimeter of which is constructed by swinging arcs of specified radii from the center of each end of the primary surface of each runway and connecting the adjacent arcs by lines tangent to those arcs. The radius of each arc is:
 - A) 5,000 feet for all runways designated as utility or visual;
 - B) 10,000 feet for all other runways.
- 2) The radius of the arc specified for each end of a runway will have the same arithmetical value. That value will be the highest determined for either end of the runway. When a 5,000 foot arc is encompassed by tangents connecting two adjacent 10,000 foot arcs, the 5,000 foot arc shall be

DEPARTMENT OF TRANSPORTATION

NOTICE OF ADOPTED AMENDMENTS

disregarded on the construction of the perimeter of the horizontal surface. ~~The horizontal surface does not include the approach and transitional surfaces.~~

3) The horizontal surface does not include the approach and transitional surfaces.

c) Conical Surface

1) A surface extending outward and upward from the periphery of the horizontal surface, at 150 feet above the airport elevation, at a slope of 20 feet horizontally for each foot vertically for a horizontal distance of 4,000 feet.

2) The conical surface does not include the precision instrument approach surfaces and the transitional surfaces.

d) Primary Surface

1) A surface longitudinally centered on a runway. When the runway has a specially prepared hard surface, the primary surface extends 200 feet beyond each end of that runway; but when the runway has no specially prepared hard surface, or planned hard surface, the primary surface ends at each end of that runway. The elevation of any point on the primary surface is the same as the elevation of the nearest point on the runway centerline. The width of a primary surface is:

- A) 250' for utility runways having only visual approaches;
- B) 500' for utility runways having non-precision instrument approaches;
- C) For other than utility runways, the width is:
 - i) 500' for visual runways having only visual approaches;
 - ii) 500' for non-precision instrument runways having visibility minima greater than three fourths statute mile;
 - iii) 1,000' for a non-precision instrument runway having a non-precision instrument approach with visibility minima as low as three-fourths statute mile, and for precision instrument runways.

2) The width of the primary surface of a runway will be the width prescribed in this Section for the most precise approach existing or planned for either end of that runway.

e) Approach Surface - A surface longitudinally centered on the extended runway centerline and extending outward and upward from each end of the primary surface. An approach surface is applied to each end of each runway

DEPARTMENT OF TRANSPORTATION

NOTICE OF ADOPTED AMENDMENTS

based upon the type of approach available or planned for that runway end.

1) The inner edge of the approach surface is the same width as the primary surface and it expands uniformly to a width of:

- A) 1,250' for that end of a utility runway with only visual approaches;
- B) 1,500' for that end of runway other than a utility runway with only visual approaches;
- C) 2,000' for that end of a utility runway with a non-precision instrument approach;
- D) 3,500' for that end of a non-precision instrument visibility minimums greater than three-fourths of a statute mile;
- E) 4,000' for that end of a non-precision instrument runway, other than utility, having a non-precision instrument approach with visibility minimums as low as three-fourths statute mile; and
- F) 16,000' for precision instrument runways.

2) The approach surface extends for a horizontal distance of:

- A) 5,000' at a slope of 20' horizontally for each foot vertically for all utility and visual runways;
- B) 10,000' at a slope of 34' horizontally for each foot vertically for all non-precision instrument runways other than utility; and
- C) 10,000' at a slope of 50' horizontally for each foot vertically with an additional 40,000' at a slope of 40 feet horizontally for each foot vertically for all precision instrument runways.

3) The outer width of an approach surface to an end of a runway will be that width prescribed in this subsection for the most precise approach existing or planned for that runway end.

f) Transitional Surface - These surfaces extend outward and upward at right (90°) angles to the runway centerline and the runway centerline extended at a slope of 7 feet horizontally for each foot vertically beginning at the sides of and at the same elevation of the primary surface and the approach surfaces extending to a height of 150' above the airport elevation which is 847' AMSL. Transitional surfaces for those portions of the precision approach surface which project through and beyond the limits of the conical surface, extend a distance of 5,000' measured horizontally from the edge of the approach surface and at right (90°)

- g) angles to the runway centerline. Circling Approach Surface - This is a surface 200' above ground level (AGL) and above the established airport elevation, whichever is higher, within three (3) nautical miles of the established reference point of Effingham - County - Memorial Freeport Airport. Additionally, in Section 62.30(a)(2), the Department is deleting the reference to "92 Ill. Adm. Code 18, Exhibits A, B and C." Also, in Section 62.30(a)(2), the word "approach" was inadvertently spelled "uproach". These errors, along with other minor changes, will be corrected by this amendment.
- h) Excepted Height Limitations - Nothing in these regulations shall be construed as prohibiting the growth, construction or maintenance of any growth or structure to a height up to 50' above the surface of the land.

- 1) A horizontal plane 150' above the established airport elevations of 711.30 feet above mean sea level, the perimeter of which is constructed by swinging arcs of specified radii from the center of each end of the primary surface of each runway and connecting the adjacent arcs by lines tangent to those arcs. The radius of each arc is:
 - A) 5,000 feet for all runways designated as utility or visual;
 - B) 10,000 feet for all other runways.
- 2) The radius of the arc specified for each end of a runway will have the same arithmetical value. That value will be the highest determined for either end of the runway. When a 5,000 foot arc is encompassed by tangents connecting two adjacent 10,000 foot arcs, the 5,000 foot arc shall be disregarded on the construction of the perimeter

of the horizontal surface. The horizontal surface does not include the approach and transitional surfaces.

- 3) The horizontal surface does not include the approach and transitional surfaces.

c)

- 1) A surface extending outward and upward from the periphery of the horizontal surface, at 150 feet above the airport elevation, at a slope of 20 feet horizontally for each foot vertically for a horizontal distance of 4,000 feet.

- 2) The conical surface does not include the precision instrument approach surfaces and the transitional surfaces.

d)

- 1) Primary Surface

A surface longitudinally centered on a runway. When the runway has a specially prepared hard surface, the primary surface extends 200 feet beyond each end of that runway; but when the runway has no specially prepared hard surface, or planned hard surface, the primary surface ends at each end of that runway. The elevation of any point on the primary surface is the same as the elevation of the nearest point on the runway centerline. The width of a primary surface is:

- A) 250' for utility runways having only visual approaches;
- B) 500' for utility runways having non-precision instrument approaches;
- C) For other than utility runways, the width is:
 - i) 500' for visual runways having only visual approaches;
 - ii) 500' for non-precision instrument runways having visibility minimums greater than three-fourths statute mile;
 - iii) 1,000' for a non-precision instrument runway having a non-precision instrument approach with visibility minimums as low as three-fourths statute mile, and for precision instrument runways.

- 2) The width of the primary surface of a runway will be the width prescribed in this Section for the most precise approach existing or planned for either end of that runway.

- e) Approach Surface - A surface longitudinally centered on the extended runway centerline and extending outward and upward from each end of the primary surface. An approach surface is applied to each end of each runway based upon the type of approach available or planned

for that runway end.

- 1) The inner edge of the approach surface is the same width as the primary surface and it expands uniformly to a width of:
 - A) 1,250' for that end of a utility runway with only visual approaches;
 - B) 1,500' for that end of runway other than a utility runway with only visual approaches;
 - C) 2,000' for that end of a utility runway with a non-precision instrument approach;
 - D) 3,500' for that end of a non-precision instrument visibility minimums greater than three-fourths of a statute mile;
 - E) 4,000' for that end of a non-precision instrument runway, other than utility, having a non-precision instrument approach with visibility minimums as low as three-fourths statute mile; and
 - F) 16,000' for precision instrument runways.
- 2) The approach surface extends for a horizontal distance of:
 - A) 5,000' at a slope of 20' horizontally for each foot vertically for all utility and visual runways;
 - B) 10,000' at a slope of 34' horizontally for each foot vertically for all non-precision instrument runways other than utility; and
 - C) 10,000' at a slope of 50' horizontally for each foot vertically with an additional 40,000' horizontally for each foot vertically for all precision instrument runways.
- 3) The outer width of an approach surface to an end of a runway will be that width prescribed in this subsection for the most precise approach existing or planned for that runway end.
 - f) Transitional Surface - These surfaces extend outward and upward at right (90°) angles to the runway centerline and the runway centerline extended at a slope of 7 feet horizontally for each foot vertically beginning at the sides of and at the same elevation of the primary surface and the approach surfaces extending to a height of 150' above the airport elevation which is 711.30' above mean sea level. Transitional surfaces for those portions of the precision approach surface which project through and beyond the limits of the conical surface, extend a distance of 5,000' measured horizontally from the edge of the approach surface and at right (90°) angles to the runway centerline.
 - g) Circling Approach Surface - This is a surface 200' above ground level and above the established airport

- 2) Code Citation: 89 Ill. Adm. Code 240

- 4) Statutory Authority: Ill. Rev. Stat., 1991, ch. 23 Sections 6104.01(4), (9), (11) and (12); 6104.02, 6104.03 and 6105.02
- 5) Effective Date of Amendment(s): July 23, 1992.
- 6) If this emergency amendment is to expire before the end of the 150-day period, please specify the date on which it is to expire: Not Applicable.

7) Date Filed in Agency's Principal Office: July 23, 1992

8) Reason for Emergency:

Pursuant to the budgetary crisis of FY92, the Department on Aging implemented rulemaking under the Emergency Budget Act of FY1992 which reduced services to all Community Care Program clients (inclusive of in-home services (chore-housekeeping and homemaker) and adult day care service).

As a result of restored appropriations for adult day care service for FY93, and the severe impact of service reductions on elderly adult day care clients, the Department must increase adult day care service as soon as possible. Therefore, a new emergency rule delineating service maximum levels for adult day care service has been adopted.

The ability to increase adult day care service, to ensure services are being delivered in the manner prescribed by law and to protect the safety and welfare of adult day care clients, is in the utmost interest of the public in general and adult day care clients in particular. The completely unanticipated restoration of Department resources for the adult day care service, which necessitate this emergency action, has been most recent due to the passage of FY93 appropriation legislation.

9) A Complete Description of the Subjects and Issues Involved:

Effective July 23, 1992, those agencies which provide adult day care service under the Community Care Program will begin

to increase service delivery to clients receiving their service(s). Those agencies which provide adult day care service under the Community Care Program are affected by this emergency rulemaking.

This emergency rulemaking allows the Department to increase adult day care service, thereby ensuring that adult day care services are being delivered in the manner prescribed by law and in a manner to protect the safety and welfare of adult day care clients, which is in the utmost interest of the public in general and adult day care clients in particular.

10) Are there any proposed amendments pending on this Part? Yes.

EXECUTIVE ORDER
92-6
EMERGENCY FILING PROCEDURES OF
ILLINOIS PURCHASING ACT CONTINUED

Whereas, Legislation (Public Act 87-860) was recently enacted to address various budget and staff reductions within State government; and

Whereas, Section 92 of Public Act 87-860 made various changes to the Illinois Purchasing Act; and

Whereas, these changes were intended to eliminate certain purchasing duties of the Department of Central Management in recognition of budget and staff reductions within that agency; and

Whereas, these changes were also intended to provide for a less restrictive competitive process in recognition of the additional purchasing responsibilities imposed on individual State agencies by Public Act 87-860 and the budget and staff limitations experienced by those agencies; and

Whereas, one such revision eliminated the requirement that agencies file emergency purchase affidavits with the Auditor General and that such affidavits be filed by the Auditor General with the Legislative Audit Commission and the Governor at the end of each fiscal quarter; and

Whereas, it is imperative that the integrity of State procurements be maintained; and

Whereas, the procedure for filing emergency purchase affidavits is a component of the procurement process which is critical to insuring its integrity and, thus, should continue to be followed even though not currently mandated by the Illinois Purchasing Act;

Therefore, pursuant to the power vested in me by Article V, Section 8 of the Illinois Constitution, I hereby order that all Departments, Agencies, Boards and Commissions under my jurisdiction continue to follow the emergency filing procedures previously followed pursuant to Section 6a(3) of the Illinois Purchasing Act. Specifically, I direct that:

Where funds are expended in an emergency by purchase, contract or otherwise, the person or persons authorizing the expenditure shall file an affidavit with the Auditor General of the State of Illinois within 10 days after the purchase or contract setting forth the amount expended, the name of the vendor or contractor involved, and the conditions and circumstances requiring the emergency purchase. Where only an estimate of the cost is available within 10 days after the purchase or contract, the actual cost must be reported immediately after it is determined.

This order shall take effect immediately.

Issued by the Governor July 20, 1992.

Filed with the Secretary of State July 20, 1992.
